See my note below to OPA.

Page 6-27 has some information on endocrine disruptors, BPA, PFOA, phthalates, etc.  
Page 6-45 raised that TSCA gives no authority to test.

**Subject:** Fw: Fw: IBCERCC Report on Breast Cancer and the Environment

This report will released this Tuesday. Breast Cancer and the Environment: Prioritizing Prevention - Report from the Interagency Breast Cancer and Environmental Research Coordinating Committee.

Says at federal level only a small # of efforts target breast cancer and the environment. Recognized risk factors (e.g. age, gender) haven't been examined in interaction with physical and chemical exposures. The report broadly defines environment and includes chemical substances to which people are exposed through pesticides, industrial pollutants, consumer products, etc.

(See attached file: Media Advisory IBCERCC report.pdf)

Wendy, Steve, Steve and Linda,

Fyi. This is going to be release on February 12th. Please note that the recommendations in this report were reviewed by OPP and OSCP and we had noted that some recommendations were actually policy focused; there are chemical specific statements that relate to OPP and OPPT.

Mary

Mary, Vicki, Jeff -

Attached is the final *Report on Breast Cancer and the Environment - Prioritizing Prevention*, prepared by the Interagency Breast Cancer and Environmental Research Coordinating Committee (IBCERCC). As you are aware, Sally Darney was a member of the IBCERCC, and the lead authors responded satisfactorily to many, but not all, of our comments.

Also attached is a summary of recommendations from the embargoed report and the media advisory. The chair of the IBCERCC will announce the release of the report on February 12.

Sally has been working with Carolyn Hubbard from ORD communications to draft a desk statement and Q&As. Carolyn will share these with Linda Stauss in a separate email.

Please let us know if you have questions.  
Fred
